Tuesday 20 July 2021

Dear Parents,

We have been advised by Public Health England that there has been a number of cases of COVID-19 within one particular class in the school, Mercury Class (year 5). One of the cases has been confirmed with a PCR test and the others are awaiting confirmatory PCR tests.

We know that you may find this concerning but we are continuing to monitor the situation and are working closely with Public Health England. This letter is to inform you of the current situation and provide advice on how to support your child. Please be reassured that for most people, coronavirus (COVID-19) will be a mild illness.

While changes to the national guidance on 19 July 2021 have removed the general requirement on education settings to contact trace, we have taken advice from Public Health England following the increase in cases in Mercury class. They have advised that as there are a number of children in the class that have been tested positive, that the class self isolated. The class has been advised accordingly.

The school remains open and your child should continue to attend as normal if they remain well.

What to do if your child develops symptoms of COVID 19

If your child develops symptoms of COVID-19, they must not come to school and should remain at home for at least 10 days from the date when their symptoms appeared. Anyone with symptoms will be eligible for a PCR test (the normally available test type) and this can be arranged via https://www.nhs.uk/ask-for-a-coronavirus-test or by calling 119.

All other household members who remain well, must stay at home and not leave the house for 10 days. This includes anyone in your 'Support Bubble'. Further information is available at: https://www.gov.uk/government/publications/covid-19-stay-at-home-guidance/stay-at-home-guidance-for-households-with-possible-coronavirus-covid-19-infection

The household isolation period includes the day the first person in your household's symptoms started (or the day their test was taken if they did not have symptoms) and the next 10 full days. This means that if, for example, your 10 day isolation period starts on the 15th of the month, your isolation period ends at 23:59 hrs on the 25th and you can return to your normal routine. If the person does not have symptoms when testing positive but goes on to develop symptoms, the isolation is extended for ten days after the onset of symptoms as explained here (in the "if you tested positive" section). If other household members become unwell they need to extend their isolation period as shown in this infographic.

Household members should not go to work, school or public areas and exercise should be taken within the home. There is also support available for those are self isolating:

World's End Lane, London N21 1PP • Telephone 0208 360 1001 office@grangeparkprimaryelt.org • www.grangeparkprimaryelt.org Headteacher: Tijen Hassan

https://www.nhs.uk/conditions/coronavirus-covid-19/self-isolation-and-treatment/help-and-financial -support-while-youre-self-isolating/ If you require help with buying groceries, other shopping or picking up medication, or walking a dog, you should ask friends or family. Alternatively, you can order your shopping online and medication by phone or online.

Household members staying at home for 10 days will greatly reduce the overall amount of infection the household could pass on to others in the community

Symptoms

The most common symptoms of coronavirus (COVID-19) are recent onset of:

- a new continuous cough
- a high temperature
- a loss of, or change in, your normal sense of taste or smell (anosmia)

For most people, coronavirus (COVID-19) will be a mild illness.

If your child does develop symptoms, you can seek advice from the nhs.uk website at https://www.nhs.uk/conditions/coronavirus-covid-19/check-if-you-have-coronavirus-symptoms/. If you are concerned about your child's symptoms, or they are worsening you can seek advice from NHS 111 at https://111.nhs.uk/ or by phoning 111.

How to stop COVID-19 spreading

There are things you can do to help reduce the risk of you and anyone you live with getting ill with COVID-19

Do

- wash your hands with soap and water often do this for at least 20 seconds
- use hand sanitiser gel if soap and water are not available
- wash your hands as soon as you get home
- cover your mouth and nose with a tissue or your sleeve (not your hands) when you cough or sneeze
- put used tissues in the bin immediately and wash your hands afterwards
- Participate in twice weekly LFD testing following national guidelines (recommended for 11 years and over). We encourage you to log your results here:
 https://www.gov.uk/log-test-site-covid19-results

Further Information

Further information is available at https://www.nhs.uk/conditions/coronavirus-covid-19/

Kind regards
