Risk Management Policy

Vers	sion and Date	Action/Notes	Date Written	Date to be Reviewed
1.0	01.12.17	Approved by Board of Trustees	Nov 16	3 Years – Nov 2019
2.0	03.12.19	Approved by Board of Trustees	Sept 19 Updated	3 Years – Sept 2022

Purpose of the Policy

The Enfield Learning Trust is committed to providing a safe environment for all members of the Trust.

Risk is an inherent aspect of all academic, administrative and commercial business activities so sound risk management principles must become part of routine management activity.

The key objective of this policy is to ensure the Trust has a consistent basis for measuring, controlling, monitoring and reporting risk across the organisation at all levels. This policy explains the Trust's underlying approach to risk management, documents the roles and responsibilities of the Board, its committees and other key parties. It also outlines key aspects of the risk management process, and identifies the main reporting procedures.

Consultation Process

This policy was developed in consultation with the Trust Board.

Risk Management Process

The Trust is committed to providing a safe environment for all members of the school community. In order to do this, we consider:

- The nature and extent of risks that the Trust faces
- The extent and categories of risks that are acceptable
- The likelihood of the risks concerned materialising
- Strategies for reducing the incidence and impact of risks that do materialise

Assessing the Risks

A risk register is compiled considering likely risks relating, but not exclusively, to:

- Strategic and Reputational Risk
- Economical/Financial/Market Risk
- Legal and Regulatory Risk
- Organisation/Management/Human Factors
- Political Risk
- Environmental Risk
- Technical/Operational/Infrastructure Risk

Once a risk has been established, the Trust will assess whether:

- The risk of both likelihood and impact of the event is high.
- The risk of likelihood or impact of the event is high.
- The risk of neither the likelihood nor the impact is high.

A point scoring system (as detailed in the matrix below) is used to assess the likelihood vs. the impact of the identified risk with greater emphasis directed towards those areas identified as higher risk marked in red.

	Almost Certain	5	10	15	20	25
Likelihood	Likely	4	8	12	16	20
(A):	Possible	3	6	9	12	15
	Unlikely	2	4	6	8	10
	Rare	1	2	3	4	5
Impact (B):		Insignificant	Minor	Moderate	Major	Catastrophic

Addressing Risks

When responding to risks, the Trust will ensure that the risk is well-managed so that the potential threat does not materialise.

The Trust will adopt one of the four risk responses outlined below:

- **Terminate** Counter measures are put in place to either stop a problem or threat occurring, or prevent it having an impact on the organisation.
- **Transfer** The risk is transferred to a third party, for example, through an insurance policy.
- **Treat** The response actions either reduce the likelihood of a risk developing, or limit the impact on the school to acceptable levels.
- **Tolerate** The Trust accepts the possibility that the event may occur. This may be because the cost of the counter measures is too great and will outweigh the possible downside, or because the Trust believes there is only a remote possibility of the event occurring.

The risk register will be reviewed at each termly committee meetings of the Trustees and the policy will be reviewed biannually. As new risks are identified throughout the year these will be added to the risk register and assessed using the scoring methodology. All new risks will be reported by each Trustee committee meeting and be ratified by the full Board of Trustees.

Roles and Responsibilities

The Trustees have responsibility for the total risk exposure of the Trust and will be responsible for:

- Approving major decisions affecting the Trust's risk profile or exposure
- Deciding on the Trust's appetite for risk
- Determining what types of risk are acceptable/not acceptable and monitoring significant risks and control improvements to mitigate risks
- Annually reviewing the Trust's approach to risk management and approving changes or improvements to key elements of the process and procedures

The Role of the Audit and Risk Committee

The role of the Audit and Risk Committee is to support the Trustees in ensuring that a framework is established and maintained for the identification and management of risk and to monitor internal and external audit matters across all schools in the Trust.

Monitoring & Review

All Trust Board Committees will identify and evaluate the significant risks faced by the Trust by:

- Compiling a risk register
- Providing adequate information in a timely manner to the Trustees on the status of risks and controls
- Participating biannually in a risk review and reporting the outcomes to the Trustees
- Implementing policies on risk management and internal controls
- Reviewing all risks identified as "red" risks
- Satisfying itself that the less fundamental risks are being actively managed, with the appropriate controls in place and working effectively
- Reviewing all reports from internal audits and monitoring the implementation of any recommendations
- Receiving an annual review of effectiveness of the system of internal control and risk management from internal audit
- Receiving an annual report from the external auditor on the effectiveness of the internal controls reviewed as part of the audit
- Annually review the Trust's approach to risk management and approve changes or improvements to key elements of its processes and procedures.

The Trust will review this policy every three years and assess its implementation and effectiveness.
