

Grammar

Looking for cognates of the topic like planets names.
Nouns to write a metaphor about planets using correctly un-una (a-an).

Comparison of two objects using *more than*.

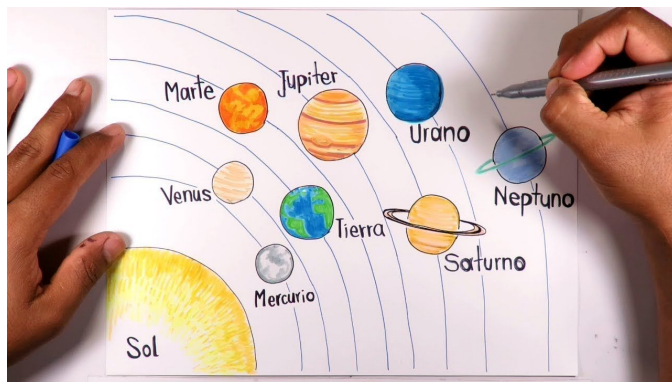

Position of adjectives in a sentence.

Culture

Space and Spain
On 21 January 2021, at about 3:56 local time, a very bright fireball was spotted over Spain. This bolide was generated by a rock from an asteroid that hit the atmosphere at about 126,000 km/h. The fireball began at an altitude of about 84 km over the region of Madrid, and ended at a height of around 21 km over that city.
