Culture

How many pets are there in Spain?

We all know that the king of pets is the dog. And that in second place you must always place the cat. Without a doubt, they are the most popular and the favorites of the majority. However, this is not the case in terms of numbers: statistics show that fish and birds are ahead in Spain!
8,619,298 fish
6,991,027 birds
6,733,097 dogs
3,795,139 cats
1,489,827 small mammals
1,240,570 reptiles
